NordPass — easy, flexible, secure

 <p>Minimize the risk of human errors</p> <p>Build secure password management practices in your company. Set up centralized policies to establish a strong password standard and enable company-wide settings for secure management and sharing of sensitive data.</p>	 <p>Share credentials efficiently</p> <p>Simplify collaboration in your company and eliminate the endless loops of password resets. Share passwords and other sensitive data with your colleagues securely and add or revoke editing permissions with a few clicks.</p>	 <p>Oversee access management</p> <p>Track your organization's corporate data under a single pane of glass. Streamline on-and off-boarding by managing access to credentials. Assign and change members' roles and manage permissions. Get usage reports via Activity Log.</p>	 <p>Meet compliance standards</p> <p>Kickstart your compliance with cybersecurity regulations and standards. As a secure access solution, NordPass helps your organization work toward meeting cybersecurity regulations such as ISO 27001, SOC 2, and HIPAA.</p>	 <p>Build defenses against breaches</p> <p>Stay ahead of cyber attacks with the Data Breach Scanner and receive live alerts if any of your corporate data appears on the darknet. Ensure all your employees' credentials are up-to-date, unique, and strong with Password Health.</p>

NordPass: The right fit for your corporate cybersecurity

- Cost-effective**
Get more for less with no hidden paywall. All cybersecurity and credentials management features are available upon purchase.
- Easy to use**
NordPass offers an easy-to-use, intuitive interface that allows new organization members to quickly adopt and start using the service.
- Effective communication**
Get swift responses directly from the NordPass team. Our sales and 24/7 support teams are ready to help with any queries and problems.
- Security expertise**
Work with cybersecurity veterans. NordPass was developed by Nord Security – experts with over a decade of experience in the industry.
- Seamless integration**
Expand your company's IT stack. NordPass is compatible with major ID providers like Entra ID, MS ADFS, Okta, and Google Workspace.

“ Security is a priority when running a global company. The Dr.PAWPAW team uses NordPass to make operating in over 45 countries simple. Each team has simplified the way we store passwords and access accounts, all whilst ensuring everything is 100% secure. As the team has grown it has been easy to add new users, it grows with us as our team grows!

- **Katie Sayers,**
Social Media & Influencer Leader @ Dr.PAWPAW
